The BOSS Mobile App highlights:

- *Barcode scan a given asset and look up the location, associated users, current status in seconds*
- *View all the details of a given asset*
- *Allows Technicians to input notes, Update location, status*
- *Enables Location Tracking based on granular details, to map an Asset*
- *Shows the number of Incidents for a given Asset so you can be on top of it*

Coming soon!!! The BOSS app on the iPhone

*Stay tuned. In a couple of weeks, BOSS will release the app on the **iPhone/iPad** to benefit all iPhone/iPad users.*

With BOSS around your life as an IT Manager just got a lot easier!!!
